Current regulation reference

5252f changes the input current by changing the peripheral inductance value. The following shows the relationship between inductance and input current when driving LED.

Single color LED

Inductance	Spec.	LED	Input current (mA)
220 μ H	0307	1 LED	5.3
150 μ H			7.9
82 μ H			13.9
68 μ H			18.2
47 μ H			25.4
22 μ H			46.8

Colorful LED

Inductance	Spec.	LED	Input current (mA)	Output current (mA)
